DETAILED ACTION

Receipt is acknowledged of the amendment, terminal disclaimer and drawing replacement sheets, on 11/14/2005, which have been entered in the file. Claims 23-28 are pending.

Drawings

1. The drawings were received on 11/14/2005. These drawings are acceptable to the examiner.

Terminal Disclaimer

2. The terminal disclaimer filed on 11/14/2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent issued from U.S. application serial number 11/002,083 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

- 3. Claims 23-28 have been allowed over the prior art of record.
- 4. The following is an examiner's statement of reasons for allowance: As discussed in applicant's remarks, see the paragraph beginning on page 7 and ending on page 8, of the remarks filed on 11/14/2005, Derbenwick et al and the other prior art of record, taken alone or in combination, fails to teach or fairly suggest an anode of the first diode is coupled to the second electrode which is the same potential as that of a substrate of the IC chip, wherein the IC chip is coupled between the first conductor and the second conductor through the first electrode and the second electrode, and wherein the other of the first and second conductors crosses over the slit and is coupled to said one of the

first and second conductors; in combination with the other claimed limitations as set forth in claim 23.

Furthermore, without the benefit of applicant's teachings, there is no motivation for one of ordinary skill in the art at the time of the invention to modify or combine the prior art in a manner so as to create the specific structure as recited in claim 23.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Matsuno et al (US 5,027,107), Geeraert (US 6,504,507), Usami (US 6,930,401), Forster et al (US 2005/0093677), Usami (US 6,657,432), Fukushima et al (US 6,836,248) and Desargant (US 5,781,159) all teach wireless semiconductor devices.
